

SHIFT RESTORE

POWERED BY SCIENCE

HIGH PERFORMANCE FORMULAS

STOPS HESITATION &
ROUGH SHIFTING

DISSOLVES HARMFUL
GUM & VARNISH BUILDUP

QUIETS TRANSMISSIONS

INCREASES
TRANSMISSION LIFE

ELIMINATES RUST &
CORROSION

AUTOMATIC TRANSMISSION PROTECTANT + CLEANER

SMOOTHER GEAR CHANGES; REDUCES OPERATING TEMPERATURES

SHIFT RESTORE is a Group V Ester that quickly acts to solve issues with automatic transmissions, such as erratic and inconsistent shifting, hesitation and rough operation, excessive noise and overheating.

SHIFT RESTORE is engineered to safely dissolve the harmful gum and varnish that forms over time on the surface of precision transmission components. It also lubricates and protects these key components for an extended transmission life. Use as a preventative maintenance product or to fix an existing problem.

TREATMENT PLAN

Use approximately 1.5 OZ of SHIFT RESTORE per 1 QT of transmission fluid. May be added during a fresh fluid change or midway through current service interval. Use every fluid change for best results.

Note: Product displaces equal amount of fluid.

Fill to your manufacturer's recommendation.

SYMPTOMS

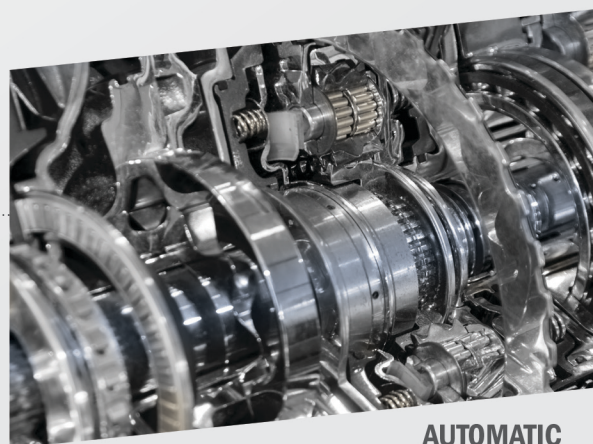

HARD SHIFTING	OVERHEATING
INCONSISTENT DOWN SHIFTING	NOISY TRANSMISSIONS

AVAILABLE IN

16 OZ	#HSSTSE16Z UPC 7-31717-96116-1
1 QT	#HSSTSE32Z UPC 8-81314-37629-2

PRODUCT COLOR

 clear w/bright red tint
